

TC073 / Top500 rank 73

Resistance-as-information

Core move

Treat resistance as diagnostic information before you explain, defend, persuade, adapt, or stop.

Minimum viable phrase

I am hearing some hesitation. What is the main thing that does not work for you?

Perception

Notice hesitation, pushback, delay, tense agreement or a yes-but.

Move

Pause the rebuttal reflex and name resistance neutrally.

Calibration

Continue if it gets clearer. Stop if it is a firm no.

Perception -> Move -> Phrase -> Calibration -> Recovery -> Chain

Field-use prompts

What is the resistance telling us?

Is this a no, a not-yet, or a yes-if?

What risk are you trying to prevent?

What condition would make this workable?

You do not have to justify the no. I asked to understand, not to pressure you.

Safety rule: ask to understand, not to pressure. A firm no is enough.
