

TC006: Emotional Labelling

Combined TC001-grade field card

- 1

Minimum move
Use “That sounds [emotion]” or “[emotion]?” with a tentative tone, then stop talking.
- 2

Core formula
Tentative cue + emotion/concern + optional reason + pause
- 3

Why it works
Makes people feel seen without needing to explain everything from scratch.
- 4

How to do it
Notice the emotional signal: Listen for tone, intensity, repeated words, contrast words, pace, facial shifts, or what seems important beneath the facts.
- 5

Calibrate
Signs it is working
- 6

Recover / neighbour
“I may have put the wrong word on it.” Listening / reflection family distinction: TC006 Emotional Labelling is the right choice only when its specific cue is present.
