

TC020 / Rank 25 - Low-Friction Ask

TwoCard_Combined - v24

- Make a request easier to answer by reducing effort, uncertainty, timing pressure, or social cost while preserving a real option to decline.
- Reduce effort -> reduce ambiguity -> give an easy response path -> make no genuinely acceptable.
- If it is easy, could you send me the link? No worries if not.
- The speaker says “no pressure” while still creating pressure, guilt, obligation, or ambiguity about what yes would involve.
- Low friction means easier to answer, not harder to refuse.
