

Similarity signalling

One true overlap. One brief signal. One return of focus.

Core move

Notice one real overlap, signal it briefly and modestly, then return focus. Formula:
shared point + modest signal + evidence + return of focus.

Pocket phrase

"I recognise that part - different situation, but that piece is familiar. What is it like on your side?"

Use / avoid

Use when a true overlap can reduce distance. Avoid when similarity would be invented, minimising, boundary-blurring, pressure-based, or self-focused.

Neighbour choice

If you are looking for overlap, use TC039. If you are following energy, use TC041. If you are naming one real overlap, use TC054.
