

# Feeling-plus-need reflection

Perception -> Move -> Phrase -> Calibration -> Recovery -> Chain

Core move: reflect one feeling plus one likely need, tentatively, then pause.

Formula: cue -> feeling -> need -> tentative phrase -> pause -> follow or release.

Minimum viable phrase:

"It sounds frustrating because you needed clearer next steps."

Calibration: green = adds detail or corrects easily; yellow = flat or shorter; red = defensive or withdrawn.

Recovery: "I may be reading that wrong." / "We can keep this practical."

**Field tip: one feeling + one need + one pause. Do not chase a perfect insight.**
