

Conversation bookmarking

Name it. Save it. Return to it.

Core move

Mark an important side-thread, show why it matters, give a return path, and keep the current flow.

Formula

Marker + Value + Return path + Continue. Example: I want to bookmark that because it matters. Let us come back after this part.

Use when

A useful point appears but following it now would derail the conversation or agenda.

Avoid when

The point is urgent, safety-related, emotionally central, or a decision blocker.
