TC067 - Advice request

Combined field card

1. Perception

They have relevant judgement, role knowledge, taste, experience or context.

2. Move

Ask for one bounded piece of guidance; do not make them own the whole decision.

3. Phrase

Could I ask your advice on one part of this? What would you look at first?

4. Calibration

Ease means continue. Burden, confusion or politeness means narrow, pause or release.

5. Recovery

That was too broad. Let me narrow it to one part. A quick instinct is enough.

6. Chain

Specific appreciation -> Advice request -> Status generosity -> close-loop thanks.

Use for clarity and respect - not pressure, extraction, obligation or decision dumping.
