TC071: Conversation re-entry

Complete field card for restoring a broken thread.

Break -> Thread -> Choice

Core formula
"We got interrupted. You were saying [specific thread]. Want to pick that back up?"

Release clause
"Or we can leave it if the moment has passed."

Perception
The thread broke.

Move
Name the break and anchor.

Phrase
Invite a return.

Calibration
Watch energy.

Recovery
Repair pressure.

Chain
Use follow-up or release.

Best example
"We got interrupted right as you said the handover got messy after Friday. Want to pick up there?"

Sensitive topic
"No pressure to keep going. I just did not want to lose it if it still matters."

Neighbour distinction
TC071 restores one interrupted thread. TC001 follows a live thread. TC038 manages multiple threads. TC065 bookmarks for later. TC078 uses callback for warmth.

Field tip: Do not ask people to rebuild a broken thread you can restore for them.

If they decline, the best move is: "All good - we can leave it there."
