Low-pressure invitation - combined

Perception -> Move -> Phrase -> Calibration -> Recovery -> Chain.

Perception

• Notice interest, hesitation, busyness, silence, or possible desire for entry.

Move

• Invite once, clearly, with the cost and the opt-out visible.

Phrase

• "If useful, I would value your take. If not, no need."

Calibration

• Relaxed yes/no = good. Over-explaining = pressure may be leaking.

Recovery

• Name the pressure, remove it, and accept the next answer.

Chain

• Contextual opener -> Low-pressure invitation -> Autonomy release.
