TC083: Ask what would make it workable

Front/back combined field card.

Core formula

Acknowledge friction + ask workable conditions + protect autonomy + agree next small step.

Minimum viable move

"Got it. What would make this workable, if anything?"

Best for

Blocked plans, overloaded teams, scope friction, repair, disagreement, and feasibility checks.

Avoid when

A clear no, safety boundary, consent issue, or power-sensitive pressure is present.

If vague

Ask: "Which part is least workable: timing, scope, risk, or something else?"

If specific

Reflect it: "So the workable version needs a two-hour cap and cleaner data."

If impossible

Name it: "I cannot meet that condition, so I should not pretend this version works."

If no

Release it: "Thanks for being clear. I will not push this version."

Use this to increase clarity and agency, not to wear down a no.
