

THE MOVE

Surface content: what actually happened? -> Value clue: what mattered in it - fairness, reliability, respect, craft, safety, belonging? -> Tentative phrase: "It sounds like..." / "Part of this may be..." / "I may be off, but..." -> Calibration: do ?

START HERE

Name one likely value tentatively and leave room for correction: "It sounds like the fairness piece really mattered there - tell me if that is off."

SAY THIS

Starter reflections	<i>"It sounds like the fairness piece really mattered there."</i>
Social and everyday	<i>"It sounds like loyalty mattered there."</i>
Work and standards	<i>"It sounds like the standard mattered to you, not only the deadline."</i>
Naming the value	<i>"It sounds like the fairness piece is what made this land so strongly."</i>
Digital and text	<i>"I may be reading this wrong, but the key value seems to be fairness."</i>
Correction space and...	<i>"Tell me if that is off."</i>

AVOID

- The person wants practical information, not reflection.
- You have too little evidence and would be guessing wildly.
- The value read would sound grand, invasive, moralising or strategic.

REMEMBER

Name the value lightly, then hand it back.
