

TC090 / Do-not-fix-yet discipline

Top500 rank 90 - Do not fix first; understand first.

Core move

When a problem arrives, visibly hold the fixing reflex and stay with the person before offering solutions. Minimum line: "I won't try to fix this yet."

Formula

Notice -> Pause -> Name the non-fix -> Reflect -> Mode check -> Continue or shift. The move is not never fixing. It is not fixing yet.

Phrase bank

"Want listening first, or help sorting options?" /
"I can feel myself wanting to solve it. Let me slow down." / "No fixing unless you want it."

Calibration

Stay in listening mode when they open, slow down, say more or seem relieved. Shift when they ask for advice, name a decision or show urgent practical need.

Recovery

"I jumped into fixing. Let me back up. What is this like for you right now?" Own the miss without making them reassure you.

Use with

Reflective listening, validation without agreement, meaning reflection and permission-based advice. Advice comes later, by invitation or clear need.
