TC095 / DEAR MAN

Combined field reference

1. What to say

Describe facts. Express impact. Assert the ask or no. Reinforce the constructive reason. Keep each step short enough to say under pressure.

2. How to hold it

Stay mindful of the point. Appear steady rather than cold. Negotiate timing, scope or format without surrendering the core boundary.

3. One-breath script

When X happened, Y was the effect. I need Z. That would help because A. I can flex on B, but the main ask is Z.

4. Safety rule

Use for clarity and self-respect, not pressure. If the exchange becomes unsafe, circular or coercive, pause or disengage.
