

Face-saving disagreement

Front card: the field move

Core move Save the person before you challenge the point: truthful bridge, precise disagreement, workable next step.	Minimum viable phrase I can see why that read makes sense. I see one part differently: [specific point].
Formula Face bridge + specific difference + shared criterion + dignified next step.	Use when A disagreement may threaten dignity, status, competence, public standing or belonging.
Avoid when Immediate safety, required escalation, bad faith, or when the bridge would be fake.	Field tip Respect the person; narrow the difference; keep the next step workable.

Face-saving disagreement

Back card: calibration, recovery and chain

Calibration Continue if they inspect the point. Recover if they defend status, go silent, or hear personal criticism.	Recovery I am not questioning your intent or effort, I am challenging this part of the plan.
Boundary phrase I understand the ask. I cannot agree to that. What I can do is [alternative].	Neighbour split Use TC092 when face is threatened; use TC005 for validation only; use SBI for behaviour feedback.
Main mistake Over-cushioning until the disagreement disappears.	Chain TC014 -> TC092 -> trade-off clarification or clean request; then pause.
