

TC018 / Rank 21 - Specific Appreciation

TwoCard_Combined - v24

- Appreciate a specific behaviour, effort, judgement, or quality so the other person knows exactly what landed and why it mattered.
- Name the specific action -> name the positive effect -> keep it proportionate -> stop before it becomes flattery.
- I appreciated how you handled X because it made Y easier.
- The appreciation becomes vague, excessive, transactional, or subtly manipulative rather than grounded in a real observed action.
- Specific appreciation is believable because it names evidence.
