

TC019 / Rank 22 - Small Ask

TwoCard_Combined - v24

- Reduce the size of a request to a small, concrete next action that is easy to understand and reasonable to answer.
- Shrink the scope -> name the exact action -> make the boundary clear -> accept yes/no cleanly.
- Could you look at just the first paragraph?
- The ask sounds small but secretly commits the person to much more, damaging trust and making the request feel manipulative.
- A small ask works only when the boundary is honest.
