

Permission-Based Advice

Full standalone TC001-grade rebuild - v24

Core move Ask before offering advice so help lands as support rather than intrusion.
Minimum viable move Would it help if I offered one thought?
Formula Check openness -> offer briefly -> let them accept, decline, or redirect.
Main risk Giving advice after a token permission check, then pushing when they hesitate or decline.
Neighbours TC015 Premature Advice Restraint; TC020 Low-Friction Ask; TC021 Autonomy Release; TC034 Two-Option Questions
Field tip Keep it natural. The technique should make the other person more comfortable, not make you sound trained.
