

Perception -> Move -> Phrase -> Calibration -> Recovery -> Chain

Perception

Notice the cue.

Move

Look for one honest overlap, name it lightly, and build from there.

Phrase

It sounds like we both care about getting this handled cleanly.

Calibration

Follow green lights; release on yellow/red lights.

Recovery

I may be reading that wrong.

Chain

TC005 Validation Without Agreement -> TC039 Common-Ground Discovery -> TC013 Clean Request
