

- Formula: Bottom line -> key reason -> implication -> optional detail
- Move: put the answer, recommendation or ask first, then give only the needed support
- Minimum: Bottom line: I recommend X. The reason is Y. The next step is Z.
- Best for: briefings, emails, handovers, recommendations, urgent decisions and time-poor audiences
- Avoid when: grief, apology, conflict repair or moments where listening must come first
- Failure mode: being abrupt and skipping needed context or empathy
