Topic Preference Detection

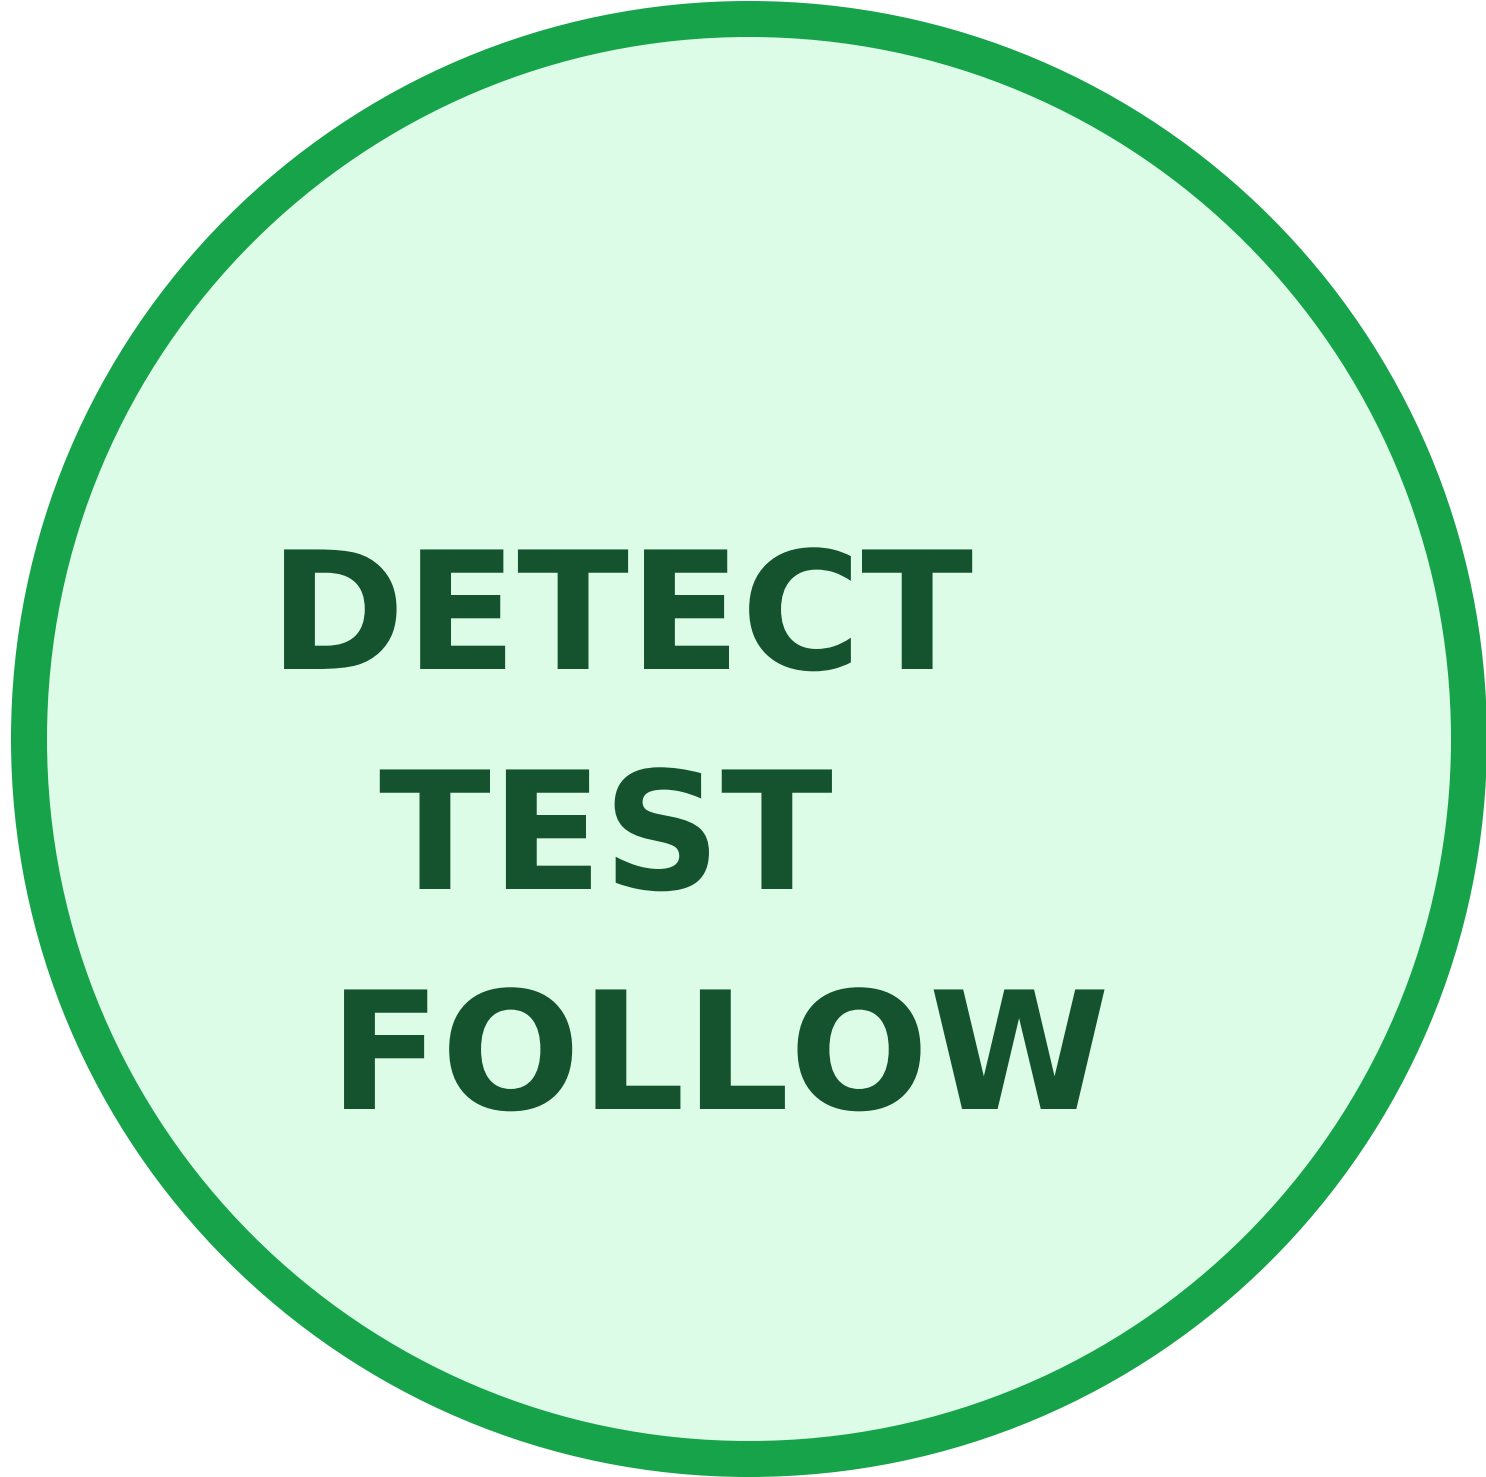

Core move: Detect the topic that gets more energy, name the signal softly, offer a choice, and follow the answer.

Minimum phrase: "You seemed more interested when we got to [topic]. Want to stay there or keep moving?"

Formula: Signal + tentative label + choice + respectful follow-through.

Calibration: Expand on green cues. Soften on amber cues. Release on red cues.

Field tip: Notice the spark. Name it softly. Offer a choice. Follow the answer.
