

Shared identity language

Name legitimate togetherness without pressure.

Core move

Name a real shared role, goal, value, constraint, or standard so the other person feels you are standing with them, not recruiting them.

Minimum phrase

"We both care about [shared outcome], even if we see the route differently."

Formula

Shared anchor + difference-respect + next cooperative move.

Calibration

Continue if they soften or add detail. Adjust if skeptical. Stop if they reject the frame.

Recovery

"I may have overstated the we there. Let me speak for myself."

Safety

Never use shared identity to pressure agreement, erase difference, or hide accountability.
