

THE MOVE

Notice energy -> close respectfully -> bridge to a live thread -> offer choice -> calibrate after the switch. -> Compact: "This topic may be complete for now. The more useful thread seems to be X. Want to move there?" -> Soft: "I might be ?

START HERE

That may be enough on this for now. Want to switch gears?

SAY THIS

Quick pivots	<i>"That may be enough on this for now. Want to switch gears?"</i>
Social / gentle pivot	<i>"This bit may have run its course. Want to switch to something lighter for a minute?"</i>
Professional / meetings	<i>"We seem to have enough on that point. I suggest we move to the next decision unless there is a live concern."</i>
Name the energy and...	<i>"The energy seems less around the prices and more around adoption. Should we move there?"</i>
Recovery after a fast...	<i>"I may have moved on too quickly. Do you want to stay with the previous point?"</i>
Consent before switc...	<i>"Before I change topics, is this something you want heard more fully?"</i>

AVOID

- The person is in active emotion
- Safety, consent, legal, medical, or accountability issues are unresolved
- The topic is quiet because it is hard but important

REMEMBER

Do not "change the subject." Close one door, point to the next, and let the other person help decide whether to walk through it.
