Thread return

TC062 / Rank 62

Combined card - move, distinction, recovery

Front - move

Formula: Notice lost thread -> bridge lightly -> name thread -> invite continuation -> ask one clean follow-up -> watch -> follow or release.

Back - distinction

Thread return is the bridge back to one earlier lost thread. It is different from broad conversation threading, energy tracking, and live-thread follow-ups.

Recovery

If the return misses: I may have pulled us back too abruptly. We can stay with where you were going.
