

TC067 - Advice request

Ask for a bounded piece of guidance

Core move

Name a specific situation, credit a real reason their judgement matters, ask one answerable advice question, release pressure, then listen cleanly.

Say

Could I ask your advice on one part of this? What would you look at first? A quick instinct is enough.

Do not use for

Fishing for validation, vague pick-your-brain dumps, hidden action requests, unpaid expert labour or advice shopping.

Recovery

That was too broad. Let me narrow it to one part. You do not need to solve it for me.

Use for clarity and respect - not pressure, extraction, obligation or decision dumping.
