

Clarify objection

TC069 / Top500 rank 69

Perception

Notice objection cues: no, hesitation, complaint, pushback, silence, or repeated concern.

Move

Pause before answering. Ask one neutral question to locate the real concern.

Phrase

"What part of that is the main concern?"

Calibration

Continue if they get more specific. Stop if the objection is a boundary or final no.

Recovery

"No need to justify it. I am trying to understand, not argue."
