DESC combined card

Front: formula and move. Back: calibration and recovery.

FRONT - The four moves

D - Describe

Name observable behaviour.
No motive-reading. No labels.

E - Express

Name impact, concern or effect.
Own your reaction.

S - Specify

Ask for one concrete change.
Make it observable.

C - Consequence

Name your boundary or next step.
Never use it as punishment.

BACK - Calibrate, recover, chain

Recovery

That sounded like a threat.
Let me restate it as my boundary.

Neighbour choice

Use SBI for feedback clarity.
Use DESC for change plus boundary.

Safety

Use for clarity and dignity,
not pressure, punishment or control.

Chain

DESC -> Autonomy release ->
Summary check or Clean request.

Field tip: use DESC to become clearer, not colder.
