TC081 COIN Combined

Full card: move, phrase, calibration, recovery and chain

COIN formula

Context -> Observation -> Impact -> Next step

Use when

You need behaviour feedback grounded in one specific moment and a concrete next action.

Avoid when

Emotion is too high, facts are unclear, formal process is needed or your aim is punishment.

Phrase

In [context], I noticed [behaviour]. The impact was [effect]. Next time, can we [specific next step]?

Neighbour check

Choose COIN over SBI when the next step must be explicit. Choose NURSE first when distress is high.

Recovery

I meant one behaviour, not your character. What context am I missing?

Field tip

Name the moment, not the person.
