TC084 / Top500 rank 84 / Listen for values

Combined field card

Cue -> value -> tentative phrase -> correction space -> pause

Perception / Move / Phrase

Notice repeated energy. Choose one value word. Say it softly: It sounds like [value] mattered there - tell me if off.

Good value words: fairness, reliability, respect, autonomy, quality, safety, belonging, loyalty, honesty, contribution.

Avoid: personality labels, moral pressure, overinterpretation, stacking many values, ignoring correction.

Calibration / Recovery / Chain

Green: adds detail or corrects easily. Yellow: polite but flat. Red: rejects, withdraws or feels labelled.

Recovery: I may be reading that wrong. Use your wording, not mine. Let me pull that back.

Chain lightly: Reflective listening -> Listen for values -> Strategic silence. Stop as soon as the person has enough.
